VAT No. PL7712594181, Register No./KRS 0000156204, Statistical No./REGON 592201398

I. General use and description

Mobility set for steeplechase barrier ZK- S0329 is designed for fast and easy steeplechase barriers' transport while taking a competition or training for a steeplechase race. It is destined to transport barriers type PP-366, PP-396, PP-500. Thanks to the bearing one person is able to transport the steeplechase barrier.

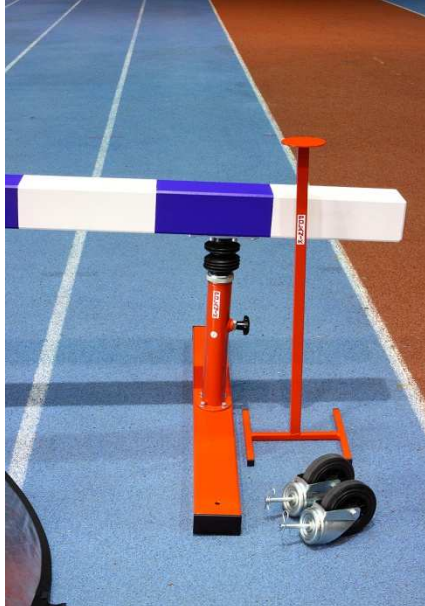

II. Technical specification

Code	ZK- S0329
construction	one-piece, steel, powder painted
wheels	4 torsional wheels, with cotter pins
height[mm]	924
bottom base[mm]	H- shaped, 300x240
upper base, Ø[mm]	round, 117
Net weight [kg]	9,50

III. Use

Step	Operation	Image
1.	Support one of the steeplechase barrier's ends using the bearing.	

2.	Take off the cotter pin and put the wheel's axis in a hole in a steeplechase barrier's foot. Then fasten the wheel using the cotter pin.	
3.	Repeat the described above activities to mount the second wheel.	
4.	Take off the steeplechase barrier of the bearing and support its second end(using bearing). Repeat all described above activities to mount two left wheels.	

5.	The steeplechase barrier is ready to transport.	
6.	To dismount wheels use the bearing again. Take off cotter pins and put wheels' axes out. The steeplechase barrier is ready to use.	

The set is packed in foil, gross weight 10 kg.

IV. Operating and maintenance

To avoid difficulties while transporting the steeplechase barriers the surface should be even, smooth and without any obstacles. During idle periods the set should be stored in a dry, roofed place.

Even the best technical solutions cannot substitute for common sense. The usage of the product must take place under the supervision of qualified sport facilities staff. The producer shall not be liable for any incidents caused by the improper assembly or its misuse. The producer reserves the right to introduce without warning changes in product constructions and colours.
