ATTENTION!

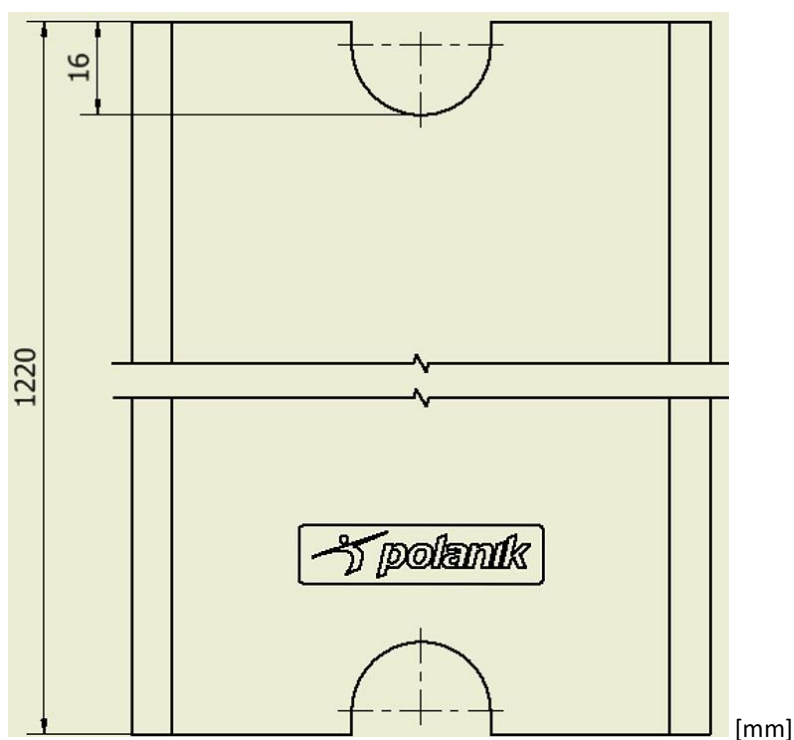

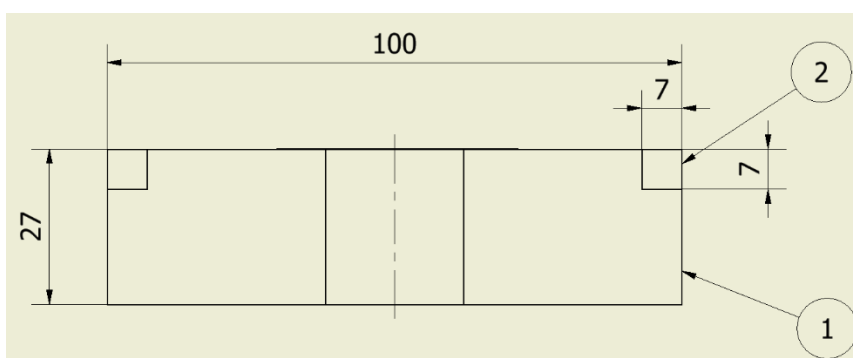

Protect from high temperature (over 40 °C) otherwise it may change its shape and dimensions, and in extreme cases it can become a liquid. Protect from moisture, even though it is impregnated and protected with paint, a prolonged contact with water can devastate or deform it.

1. Use

The product is designed to be used with competition take-off board for long and triple jumps. It is to help judges to quickly verify if a jumper crosses the take-off line.

2. Technical specification

Product code	K8-250
Name	Plasticine indicator board model 2020
Fits	Polanik competition take-off boards: S12-250, S14-250, S-250, S-0250-000-16-00-00
Material	waterproof plywood 27 mm finished with ecological paint (1), plasticine in vivid colour (2)
Design	two plasticine stripes symmetrically located (2), cut-outs for easy removing from the runway tray
Net weight [kg]	2,28

3. Operation

Plasticine indicator board is to be installed in the recess in the runway of long and triple jumps, on the side of the white take-off board closer to the landing area. If a jumper damages the plasticine stripe closer to the white take-off board, the indicator is removed from the recess, turned by 180° and reinstalled again. The deformed plasticine stripes of the indicator board are filled up and formed with the forming knife K9-250 (available separately).

4. Storage

During idle periods the product should be stored in a dry room providing relative humidity below 80% and temperature over 5°C.

5. Maintenance

Any defects in paint coating revealed during regular inspections of the product must be repaired with ecological wood paint.

6. Declaration

No. 2020-07-13
