I. General description

The cover is one of the elements of the horizontal jumps athletics facility equipment. It is designed to protect the foundation tray of the take-off board and to blank the gap in the runway when the take-off board is removed from the tray.

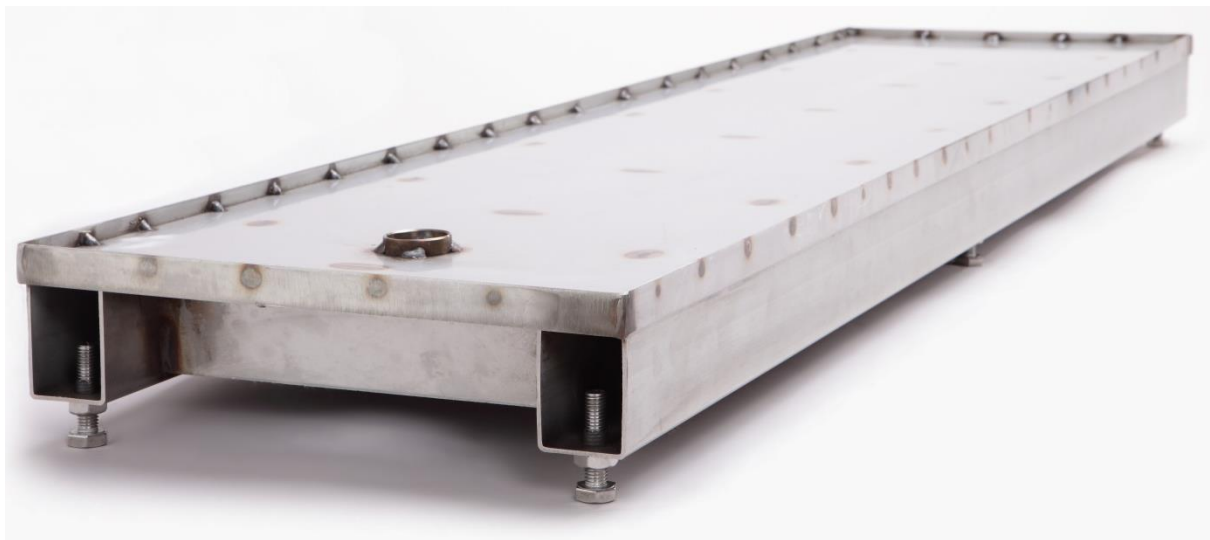

II. Technical data

Code	PBN14-S0250
Type	blanking cover
Material	stainless steel sheets and screws
Construction	welded, ribbed, 6 adjustable feet
Dedicated for	S-250, S12-250, S14-250
Weight [kg]	16

[mm]

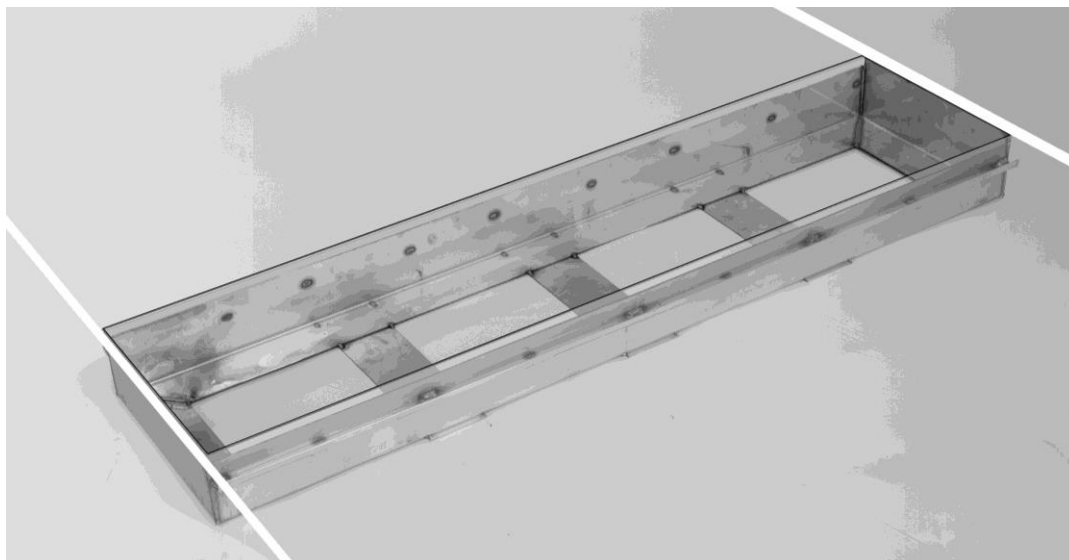

PBN14-S0250 © 2016 Polanik

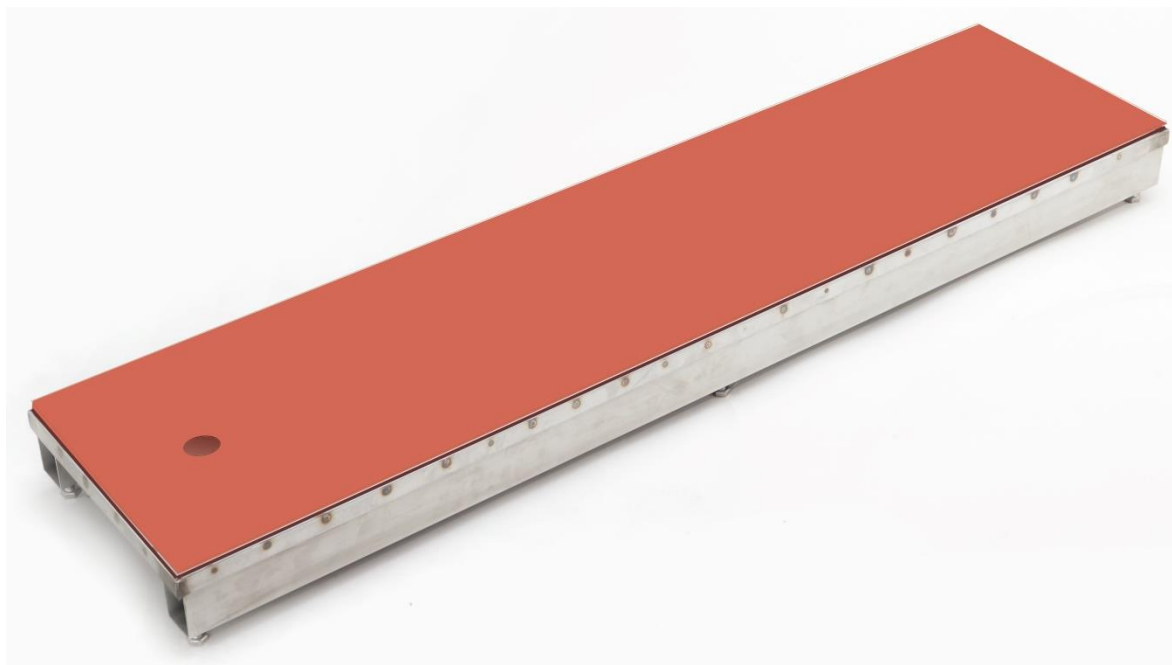

The producer reserves the right to introduce without warning changes in product constructions and colours.

III. Operation and maintenance

To place the cover the foundation tray is to be empty, so the take-off board and the base board with the drainage plastic grids (depending on the take-off board model) should be removed.

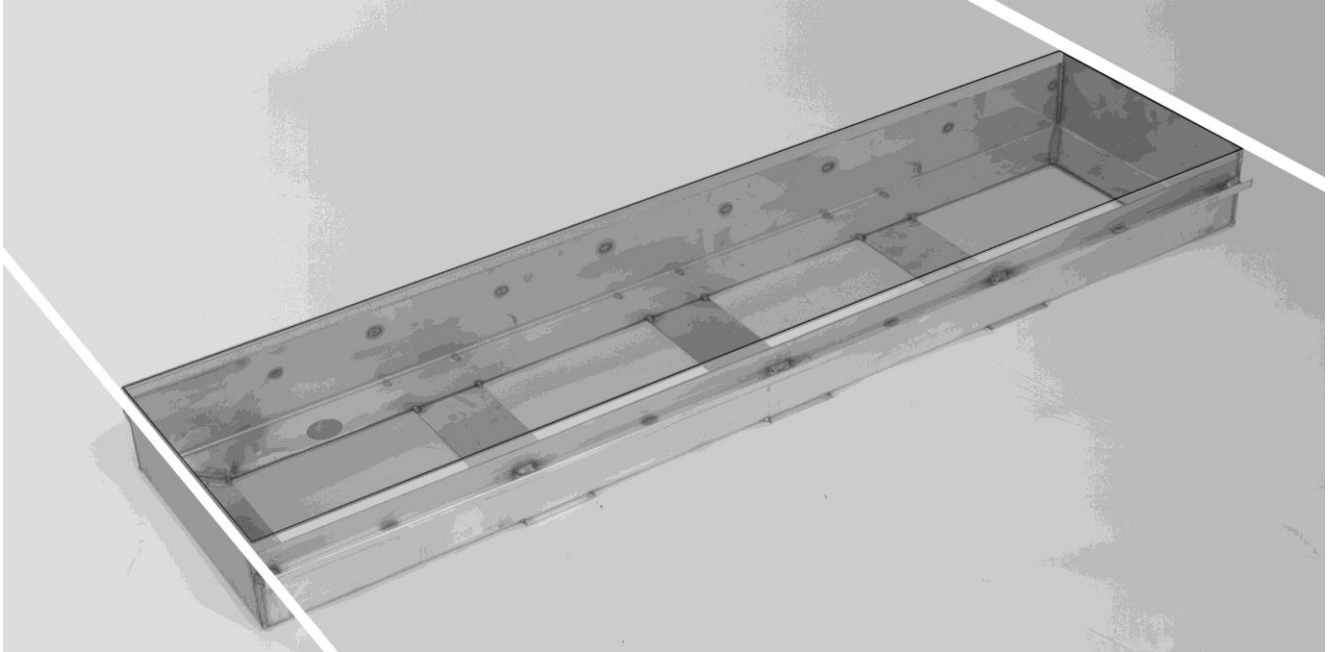

The cover is recommended for the sprayed synthetic surface. The synthetic surface installed on its top covers the metal edges, so when the cover is placed in the tray it fits flush with the runway and forms an even and safe surface for the athletes.

The synthetic surface should have the same parameters as the synthetic surface on the facility runway.

After the cover has been placed in the tray, please make sure that the top surface of the cover is levelled with the top surface of the runway. If not the cover feet have to be adjusted.

IV. Packing and transport

It is foiled and fastened to a pallet.

V. Declaration

- 1) No. 2016-01-25
2) Issuer's name: POLANIK
Issuer's address: Życzliwa 11, 97-300 Piotrkow Tryb.
3) Object of declaration:

No.	Description of goods	Code
1	Stainless steel blanking cover with edges 8 mm	PBN14-S0250

4) The object of declaration described above is in conformity with the requirements of the company production and technology norms.
